| RPIMART-18 | Story      | RPIMART-17 | create a form to submit to a listing page |                  |            |            |

The meeting discussed the creation of SQL tables and PHP webpage for user information and history, with separate databases for users and listings, coordination of database usage, and progress on different webpage components. SQL tables and PHP webpage created to store and display user information and history. Users can log into phpm admin with username "phpm admin" and password "PHPM admin." Separate databases will be created for users and listings, with the ability to add more in the future. In-person meeting needed to coordinate database usage. Work on final presentation should start soon. Quinn working on listing page, while someone else is creating sign up and login page.
