RPIMART-10	Story	RPIMART-9	Json File with listing items	In Progress	Ashrita	RPIMART Sprint 1		10/22/2024

Webex Summary:

The team discussed the role of the scrum master, divided work into two sprints, emphasized consistent design, and planned for a website framework.

The team discussed the need to establish the role of the scrum master and agreed that they are all developers. They decided to divide the work into two sprints, with the first two weeks focused on front-end development.

The team discussed the importance of consistent design language and a cohesive theme across the website. They planned to set up a framework for the website to guide back-end development and ensure connectivity.

Webex Action Items:

Develop the front end of the website within the next two weeks

Set up a framework for the website and decide on file structure and design language

Determine a consistent font and color scheme for the website

Coordinate and fine-tune the overall look of the website on Sunday

Design a logo or incorporate a generative image for the theme of the website

Create a JSON file with mock data for testing purposes, specifically for the listing page
