- Asked questions regarding our individual assignments
- Everyone is still working on their sections nothing to present or review with each other yet

The team discussed various technical tasks including email verification, implementing a partial tag system, integrating SQL table information with the website, and adding a "light saved" feature to the database.

The team discussed using the API called Cloudinary for email verification.
Sridhar plans to implement a partial tag system by next week's Wednesday scrub meeting.
Isaac will work on integrating SQL table information with the website, allowing users to edit personal info.
They discussed adding a "light saved" feature and agreed to add a column in the database for it.

Add a button for users to edit their listings
Populate the issues tab with tasks for the website
Schedule an in-person meeting for Sunday afternoon
